

WHALLON MACHINERY, INC. a "conventional palletizer" manufacturer for over 35 years now offers "robotic palletizing solutions". As an equipment manufacturer, WHALLON offers the following advantages most integrators cannot:

- ◆ A choice between conventional or robotic solutions to your palletizing and depalletizing projects;
- ◆ Over 35 year of manufacturing experience in palletizing cans, cases and pails; and conveying, stacking, and dispensing pallets;
- ◆ We design and manufacture all associated conveyors, pallet handling, and end effectors for a complete robotic cell;
- ◆ All electrical design engineering, PLC programming, controls package, panel assembly, wiring and testing done in-house;
- ◆ In-house engineers trained in Japan on robotic palletizing applications and programming;
- ◆ Field service technicians trained in Japan on installation procedures, programming, troubleshooting and maintenance.
- ◆ Field service technicians are PMMI Certified Trainers.
- ◆ Over 35 years of successful and proven manufacturing experience with over 1,500 palletizing systems sold and operating in the United States and abroad.
- ◆ Different robot manufacturers available.
- ◆ Vacuum, magnetic, and clamp end effectors available.
